

Country profiles

The information in the country profiles, customized to showcase the core indicators selected by the Commission on Information and Accountability for Women's and Children's Health, is intended to help policy makers and their partners assess progress and prioritize actions to save women's and children's lives. These country profiles reflect the data that are available for each country. Most of the data for the Commission indicators come from household surveys: mainly the USAID-supported Demographic and Health Surveys and the UNICEF-supported Multiple Indicator Cluster Surveys.^{xxix} More information on the data sources for the Commission indicators is available in the annexes to previous Countdown reports: www.countdown2015mnch.org/reports-and-articles.

New survey data are available for 22 countries since the publication of Countdown's 2012 Report. Coverage estimates that are missing or that are more than five years old indicate an urgent need for concerted action to increase data collection efforts so that updated evidence is available for policy and program development.

This report contains profiles for 75 countries with high burdens of maternal and/or child mortality, including the 49 lowest-income countries covered by the Global Strategy for Women's and Children's Health. Profiles are included for the following countries:

Afghanistan	Gambia	Nigeria
Angola	Ghana	Pakistan
Azerbaijan	Guatemala	Papua New Guinea
Bangladesh	Guinea	Peru
Benin	Guinea-Bissau	Philippines
Bolivia	Haiti	Rwanda
Botswana	India	São Tomé and Príncipe
